The screenshot shows the NetBeans IDE with the "FruitApp" project selected. The "Source" tab displays the code for "FruitApp.java". The code includes imports for `Vegetable`, `Worker`, and `Register` classes, and a `main` method that handles user input and database operations. The "Output" window shows the execution results, including the menu options and the successful build message.

The screenshot shows an Excel spreadsheet with a table of registers. The table has columns for Register ID, Name, Code, Amount, and ID. The data is as follows:
