

TEAM 03: Syntax Error

Inspector: Team 07

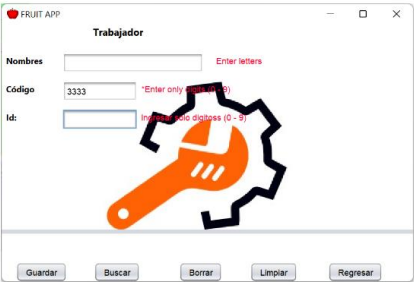

- 9. Granda Velasquez Carlos Javier
 - 10. Ibarra Gaona Ronny Joel
 - 11. Imbaquinga Guaña Jose Ricardo
- Data validation 16/30
GitHub /40
Clean Code 39/50

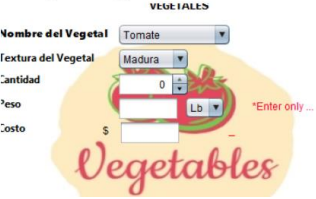

in the weight fields if there is validation but not message and the cost field there is no validation

in Costo there's not a validation and in Peso there isn't a message for the error

messages in english

The title in the frm in english

danielatituan...	979028781	Normal	7
danielatituan... Daniela Titu...	979028781	Normal	7
Eda-fa-af	979028781	Normal	7

The data is saved twice in the tables

Have an error in the text and return button in english

CODE

```
private void btnSearchActionPerformed(java.awt.event.ActionEvent evt) {  
    // TODO add your handling code here:  
}
```

button search (buscar) does nothing

The title in the frm in english

```
private void btnRegisterActionPerformed(java.awt.event.ActionEvent evt) {  
    Customer customer;  
    String email;  
    String fullName;  
    int cellphone;  
    String type;  
    String discount;  
  
    CustomerController customerController;  
    customerController = new CustomerController();  
  
    email = txtEmail.getText();  
    fullName = txtFullName.getText();  
    cellphone = Integer.parseInt(txtCellPhone.getText());  
    type = cmbCustomerType.getSelectedIndex().toString();  
    discount = spinner.getValue().toString();  
  
    if (cmbCustomerType.getSelectedIndex() != -1) {  
        customer = new Customer(email, fullName, cellphone, type, discount);  
        ConexionMongoDBCustomer conexionMongoDB = new ConexionMongoDBCustomer();  
        conexionMongoDB.conexionCustomer(email, fullName, cellphone, type, discount);  
        customerController.register(customer, this);  
        txtFullName.setText("");  
        txtCellPhone.setText("");  
        txtEmail.setText("");  
        spinner.setValue(0);  
        cmbCustomerType.setSelectedIndex(0);  
    }  
    else {  
        JOptionPane.showMessageDialog(rootPane, "Seleccionar tipo");  
    }  
    ConexionMongoDBCustomer conexion = new ConexionMongoDBCustomer();  
    conexion.conexionCustomer(email, fullName, cellphone, type, discount);  
    JOptionPane.showMessageDialog(rootPane, "Se creo con exito");  
}
```

Connection mongo should be in controller

```
private void txtCellPhoneKeyPressed(java.awt.event.KeyEvent evt) {  
    String value = txtCellPhone.getText();  
    int length = value.length();  
    if (evt.getKeyChar() >= '0' && evt.getKeyChar() <= '9') {  
        txtCellPhone.setEditable(true);  
        lblCellError.setText("");  
        if (length >= 10) {  
            txtCellPhone.setEditable(false);  
            lblCellError.setText("Maximo 10 digitos");  
        }  
    }  
    else {  
        txtCellPhone.setEditable(false);  
        lblCellError.setText("Ingresa solo digitos (0 - 9)");  
    }  
}  
  
private void txtNameKeyTyped(java.awt.event.KeyEvent evt) {  
    int key = evt.getKeyChar();  
  
    boolean mayusculas = key >= 65 && key <= 90;
